

Workshop

Driving Forces of Economic Growth Initiative (ECG)

June 10, 2009

Gvishiani Room

SUMMARY

by Finnish NMO, Russian NMO and Swedish NMO

1. We have listened to an interesting set of IIASA's researchers and their presentations. We are grateful for their professional presentations. We are also grateful to all of you who have come and actively participated.

2. Today's workshop is a first touch on these matters in the new era of the strategic plan – taken yesterday.

3. The following months will now be devoted in accordance with the procedure on 'next steps' taken by the Council yesterday – in the broad IIASA system – to the future 'implementation plan'.

4. We see today's seminar as an early and useful input to this broader scheme of work.

5. We are sure that issues of economic growth and its driving forces will distinctly be part of that process and would like thus once again to thank all involved here today for the contributions to the future of IIASA.
