

Dr Bongani Ncube is a water and agricultural scientist based at the Cape Peninsula University of Technology, South Africa. She has more than 25 years' experience in mainstream research and non-profit organisations. She started as a government ecologist in 1995, then joined the International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) as a Scientific Officer in 2000, a position in which she later obtained her PhD with Wageningen University in 2007. She then joined the secretariat of the Southern and East Africa regional network, WaterNet, where she led the multidisciplinary Limpopo Basin Challenge Program on Water and Food Project 17. She came to South Africa in 2013 where she is pursuing research on water allocation, drought impacts on agriculture, indigenous knowledge, and water resource management. She is also a postgraduate supervisor and lecturer. She is a registered Professional Natural Scientist and a member of the Water Institute of Southern Africa (WISA) and the Soil Science Society of South Africa (SSSSA). She is an international panel reviewer for the National Research Foundation (NRF), the Water Research Commission and a number of international journals. She is an Editorial Board Member of the WaterSA Journal.
