

Essential facts to understand about IIASA before you apply:

* IIASA does not do laboratory research and as such does not provide any on-site laboratory facilities

* The fellowship requires you to be present at IIASA for the program's full duration

* IIASA does not fund field research to be present at IIASA for the program's full duration

I understand the above stipulations, and wish to proceed with the application.

Family name:

First name:

Country of residence:

Gender:

Date of birth:

Email address:

Home address:

Doctoral degree institution:

PhD completion date:

English proficiency:

native speaker

English as a second language

good English skills

basic English skills

PROGRAM SELECTION:

You will be working in cooperation with one or more IIASA programs. Please indicate an option of max. three programs. Before you make your choice you need to visit the detailed descriptions of each program on our website. Please note: In line with our strategic reorganization, IIASA embarked on a new strategy at the start of 2021 including a new structure of research programs and research groups. We are working to reflect this new structure on the IIASA website which currently shows IIASA research programs for 2016 to 2020. Please explore the research areas currently present on the IIASA website to identify areas of possible research themes/interests that would fit into your developing research proposals. We encourage applicants to identify and reach out to IIASA researchers to discuss their proposals and identify potential supervisors early on in the process. our IIASA programs will have new program names at the end of February 2021. However, this will not have an effect on your current research proposal and application (it only means that successful candidates may end up in a new program albeit with the same research focus and supervising staff).

Please justify your program choice:

Title of your proposed research:

Abstract of your proposed research (max. 1500 characters):

Main research questions and objectives (max.2500 characters):

Do you already have your data, or are you in the process of obtaining it? If so, what are the requirements?

Innovative aspects:

Expected results and risks for success: (max. 2000 characters)

SUPPORTING DOCUMENTS:

Please include:

- * a CV
- * and if applicable a list of publications
- * two letters of reference to be directly sent to cofaleks@iiasa.ac.at

Application deadline is the 30 April 2021 (12am CET), please email your application together with all the supporting documents to:

**Ms. Aleksandra Cofala, IIASA Postdoc Coordinator
cofaleks@iiasa.ac.at**

Declaration of consent for processing of personal data

I hereby consent to the processing of my sensitive data (i.a. nationality) by the International Institute for Applied Systems Analysis - IIASA. Furthermore, I authorize the transmission of my personal data to other departments within the institute for various comparisons and project planning. I also authorize the transmissions of my personal data to authorized institutions, and authorities in Austria, e.g., ministries, social security office, etc., where necessary, as well as to IIASA's National Member Organizations. I can revoke my consent at any time without any adverse consequences, by contacting the data protection officer via e-mail at dpo@iiasa.ac.at. In the event of a cancellation or non-selection, my data will be deleted. Please note: Regardless of the current status of residency, successfully selected candidates will need to apply for a D-visa following instructions as provided by IIASA.
