a new generation of scientists

YSSP
40th Anniversary

Young Scientists Summer Program

Calendar **2017**

Welcome by the IIASA Director General and Chief Executive Officer

Starting today, you will be part of one of the most cherished and acclaimed programs of the International Institute for Applied Systems Analysis (IIASA).

As Director General of IIASA I warmly welcome you to the institute for the three-month Young Scientists Summer Program (YSSP), known worldwide as the training ground for future applied systems scientists and analysts. You have been selected from among many applicants for this opportunity to work on a YSSP research project and to enjoy the company of 51 other like-minded young scientists.

Policymakers worldwide need problem-focused, solution-oriented, interdisciplinary research to help them with their complex decision making: in other words, they need systems analysts.

The YSSP started in 1977, five years after IIASA was founded, when Roger Levien (IIASA Director from 1975–1981) opened the first young scientists program in order to start building a new cadre of applied systems analysts for the future. The YSSP Program has taken place every year since then, offering hands-on practical experience with applied systems analysis in a multinational and multicultural setting.

You are preceded by more than 1,817 YSSPers from 86 countries. Many have achieved high positions in science, business, and government. Some returned to IIASA as research scholars; others continued to work as close collaborators in the IIASA research network. All report great memories of their time at Schloss Laxenburg.

While your research project is a major part of your stay, the YSSP also offers opportunities for widening your horizons by participating in discussions with IIASA scientists, attending seminars given by prominent invited speakers, or contributing to various ad hoc science groups, as well as joining in social activities.

I wish you all a great summer!

A handwritten signature in blue ink, which appears to read "Pavel Kabat".

Professor Dr. Pavel Kabat

Official events

Welcome reception – arrival at IIASA

-  Thursday, 1 June, 9:00–09:30
-  Wodak Conference Area
-  YSSP team, YSSP program representatives, head of Human Resources, and others
- Refreshments will be served in the Wodak Conference Area

Official opening – part 1

-  Thursday, 1 June, 9:30–10:30
-  Wodak Room
-  Welcome to IIASA – Pavel Kabat
- Introducing the YSSP team – JoAnne Bayer, YSSP Dean
- Introductory remarks – Piera Patrizio, former YSSP participant

Integration into IIASA programs and introduction to supervisors

-  Thursday, 1 June, 10:30–12:00
-  Program representatives will pick you up from the Wodak Room and escort you to your research program
-  Introduction to YSSP supervisors, program staff, program administrator and your workspace followed by lunch with your research program at the Schloss restaurant

Official events

Learn about the YSSP calendar 2017 — Q&A session

-  Thursday, 1 June, 13:30–14:15
-  Wodak Room
-  YSSP Calendar — Your summer guide
- Find out about the great variety of scientific and social activities available and ask questions. Meet the Staff Association Committee President Ana Korosu.

Official opening – part 2

-  Thursday, 1 June, 14:15–15:30
-  Wodak Room
- Briefings:
- General information – Human Resources representative
- Introduction to the IIASA Science-Art program, Gloria Benedikt, associate for Science and Arts, and Fabian Heidegger, former YSSP and *Courage* participant
- Introduction to IIASA Computing Environment – Joe Undercoffer, head of Information & Communication Technologies

Human Resources briefing and photographs

-  Friday, 2 June
- Individual groupings to be announced
-  General Purpose Building

Tick shots

-  First tick shot: Friday, 2 June, 13:30–16:30
- Second tick shot: Thursday, 22 June, 13:30–16:30
- Individual groupings (see handout in your welcome folder)
-  Dr. Schuster's office, General Purpose Building, 2nd floor

"My PhD research required me to link extremely disparate disciplines in a manner that was also relevant to the global issues being faced by society on a daily basis. This would not have been possible for me without the experience I gained at IIASA during the YSSP."

Talha Manzoor, 2013

Official events

YSSP introductory research presentations followed by "Heuriger" dinner

IIASA program directors briefly present the programs' research areas and YSSPers present the research they will be conducting during this summer.

This gives you an opportunity to pass on brief details of your research to your fellow YSSPers, such as its title, objective, and focus, what motivates your research, and why you find it challenging. Note: your abstracts and bibliographies will be available at the venue.

 **Thursday, 8 June, 09:00-17:00**

 **Gvishiani Room**

Agenda:

- 09:00 Welcome and opening remarks (JoAnne Bayer/Brian Fath)
- 09:10 Advanced Systems Analysis (ASA)
- 09:40 Evolution and Ecology (EEP)
- 10:10 Energy (ENE)
- 10:40 *Break*
- 10:55 Air Quality and Greenhouse Gases (AIR)
- 11:20 Ecosystems Services and Management (ESM)
- 12:00 *Lunch*
- 13:30 Ecosystems Services and Management (ESM) - continued
- 14:00 World Population (POP)
- 14:20 Risk and Resilience (RISK)
- 15:00 *Break*
- 15:15 Transition to New Technologies (TNT)
- 15:30 Arctic Futures Initiative (AFI)
- 15:40 Exploratory Special Projects (ESP)
- 15:50 Water (WAT)
- 16:20 Communications (COM)
- 16:35 *Close*
- 17:30 Leave for evening event (pick up at the Schloss entrance)
- 18:00 Dinner at "Heuriger" Hofstdter (wine tavern)
- 21:00 Transportation back to Vienna

Official events

Detailed introduction to library services and use

 **Wednesday, 7 June, 10:30-11:15**

 **Gvishiani Room**

 **Information session and visit to the IIASA library - Michaela Rossini, Library Manager**

Final colloquium

At this event, you present your research findings to your colleagues and other IIASA scholars

 **Thursday, 24 August, 09:00-17:30**

Friday, 25 August, 9:00-17:00

 **Wodak and Gvishiani Rooms**

Farewell banquet and dance

 **Tuesday, 29 August, 17:00-24:00**

 **Panorama Restaurant**

Transportation from the venue to Mdling and Vienna will be provided

An online version of the calendar
can be found here:

Scientific program

This section gives an overview of the scientific events that are planned for the summer. The program includes seminars, workshops, and other activities, which we hope will enrich your summer by:

- acquainting you with IIASA scientists and their research,
- providing feedback on your research,
- stimulating interdisciplinary inquiry,
- providing information on specialized research tools, and
- adding to your YSSP experience.

In addition, IIASA has arranged lectures by internal and external speakers that you are welcome to attend. We will keep you updated on summer events on the online YSSP calendar (see www.iiasa.ac.at/yssp/calendar).

While these activities are not mandatory, we encourage you to participate actively and use the opportunity to broaden your perspective and knowledge. If you would like to hear more about IIASA research or organize a discussion group or other activity, the YSSP team is happy to assist.

YSSP 40th anniversary celebration

 **Tuesday, 20 June**

 **Conference Center**

All-day symposium: YSSP alumni speakers in moderated panels on four research themes that have been central to IIASA research throughout its history: energy and climate, population, land and agriculture, and models, risk, and policy.

For details, see www.iiasa.ac.at/events/40yssp

Evening: Dinner and soccer game with YSSP alumni and IIASA staff at the Schloss Restaurant

 **Tuesday, 21 June**

 **Various rooms in IIASA -TBD**

Small group sessions with YSSP alumni and IIASA staff

Opportunities for cooperation with IIASA; Mechanics of cooperation with IIASA; Intergenerational perspectives on the future of YSSP; Emerging global issues and the role of international cooperation; Setting up a YSSP alumni mentoring network; The IIASA contribution to the science-policy interface; Science for the UN Sustainable Development Goals

Scientific program

Introduction to GIS (Geographic Information Systems) workshop

The session will begin with a lecture covering the basics of GIS—namely, vector and raster data, spatial analysis, ArcGIS, and Quantum GIS (an open-source GIS package). This will be followed by a hands-on section where participants can work through a series of exercises to learn ArcGIS or Quantum GIS, depending on their interests. Please register your interest prior to the workshop by emailing Linda See (see@iiasa.ac.at) to discuss getting the software installed on your laptop and then bring your laptop to the session. This workshop is aimed at users with no or limited GIS experience. Anyone with moderate or advanced GIS experience can contact Linda See during the summer to discuss any GIS issues.

 **Friday, 23 June, 09:30-12:30**

 **Gvishiani Room**

 **Linda See, research scholar, ESM**

Empowerment and performance workshop for YSSP candidates

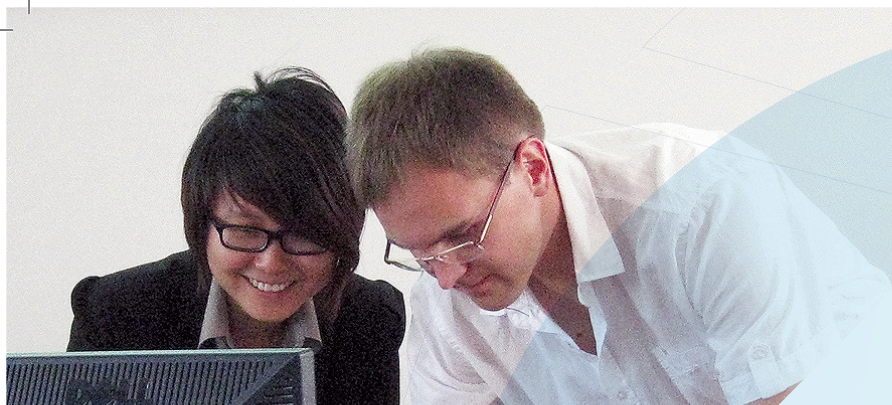

This workshop will take YSSP participants on a context transformation journey to empower them to create a YSSP experience characterized by performance, integrity, and engagement. The workshop introduces and employs professional coaching tools and methods by which YSSP participants will be challenged to:

- step into their power by taking 100% responsibility for their struggles and challenges,
- learn about the nine key areas of a PhD,
- understand and transform the underlying causes of being (dis-)empowered,
- create an empowering context and relationships, and
- formulate clear commitments and actions to enact the new context.

 **Wednesday, 28 June, 09:00-12:30**

 **Gvishiani Room**

 **Lukas Figge, YSSP alumni (2013)**

Scientific program

Data management and statistics in R workshop

R is an open source platform for statistical computing freely available for several operating systems. This workshop will teach you how to get started in R using RStudio to facilitate learning. Although an elementary background in statistics will be assumed, we will start by refreshing basic statistical concepts, and then you will get introduced to R, its basic data management and analysis capabilities, as well as graphical exploration of data. You will learn how to extract descriptive statistics and how (and when) is appropriate to use inferential statistics, especially linear models. Depending on time and participant needs, the use of general and generalized linear mixed models will also be explained.

Monday, 3 July, 10:00-12:00

Tuesday, 4 July, 10:00-12:00

Wodak Room

Juan Carlos Laso Bayas, IIASA research scholar, ESM

Please register your interest prior to the workshop by emailing Juan Carlos Laso Bayas (lasobaya@iiasa.ac.at) to discuss getting the software installed on your laptop and then bring your laptop to the session.

Rethinking paradigms in interdisciplinary research

According to the historian of science Thomas Kuhn, science progresses gradually within paradigms, and then abruptly when paradigms are challenged and replaced. What are the fundamental assumptions on which specific fields of research are based, and how does this affect interdisciplinary and systems research? In this interactive session, we will first look at key elements of Kuhn's views on paradigms and WVO. Quine's notion of a web of belief; we will then analyze the fundamental assumptions at work in our research fields and methodology; and conclude by discussing the effects of different fundamental assumptions on common research projects.

Wednesday, 12 July, 9:00-12:00

Wodak Room

Karim Benammar, THNK School of Creative Leadership

"My stay in the YSSP at IIASA in the summer of 2013 was definitely crucial to my academic career, not only because of an important publication, but also because it helped me finish my PhD thesis and get a European doctorate at Rey Juan Carlos University the following year. The international experience, along with the interaction with IIASA researchers, is really priceless."

Emilio L. Cano, 2013

Scientific program

Plural rationality in forest management game

The management of common-pool resources — such as water, forests, and the atmosphere — is perhaps the most challenging governance issue of all. The IIASA cross-cutting project (RISK and EEP), The Equitable Governance of Common Goods, has developed a game to illustrate the issues involved in managing common-pool resources, which the participants will play. The game strives to reveal plural rationalities as described by cultural theory and to test the role that such plural rationalities, or different worldviews, play in managing a common-pool resource.

Thursday, 13 July, 15:00-17:00

Gvishiani Room

JoAnne Bayer, acting program director, RISK
Peter Bednarik, postdoctoral research scholar, EEP/RISK
Ulf Dieckmann, program director, EEP
Piotr Magnuszewski, research scholar, RISK
Karl Sigmund, senior research scholar, EEP

Director's lunch

Chance to provide feedback and exchange ideas with IIASA Director General and CEO Professor Dr. Pavel Kabat in small cross-program groups.

Monday – Friday, 17–21 July, 12:00-13:00 (except Wednesday)

Elisabeth Room

18

Scientific program

IIASA science fair - luncheon

Interactive poster displays with IIASA scientists pertaining to ongoing research in each program.

 Wednesday, 19 July, 12:00-13:30

 Wodak and Gvishiani Rooms

Manuscript preparation seminar

Your scientific career will largely be assessed by the quality and quantity of publications in peer-reviewed journals. Therefore, it is necessary to be able to effectively communicate your results to your peers. This seminar will provide an editor's perspective on a journal's three Rs: Readers, 'writers, and Reviewers, as well as tips for writing clearly organized, publishable, and highly cited papers.

 Wednesday, 26 July, 10:30-12:00

 Wodak Room

 Brian Fath, research scholar, ASA

Scientific program

YSSP Peccei and Mikhalevich seminars

Research presentations from YSSP 2016 award winners.

 Dates to be announced

 Venue to be announced

Alternative economic and monetary systems (AEMS)

Joint lecture and activity with participants in University of Natural Resources and Life Sciences, Vienna (BOKU) summer school - <http://summer-university.net/study-abroad/aems-vienna/>

 Monday, 7 August 2016, 09:00-12:00

 Wodak Room

 Helga Kromp-Kolb, head of the Centre for Global Change and Sustainability, BOKU

Science - art - journalism: The potential of a new strategic alliance

A media perspective and discussion on: How and why does a journalist pick up a story? What would it take to improve media coverage on science? How can scientists, artists and journalists work together to present and transmit results more effectively?

 Wednesday, 2 August, 11:00-12:00 (followed by lunch)

 Wodak Room

 Thomas Seifert, deputy editor in chief of the Austrian daily newspaper 'Wiener Zeitung'

19

20

Social activities

Vienna walk

Sunday, 4 June, 12:00-14:00

Meeting point: U1/U3 stop "Stephansplatz" Café "AIDA"
Guided tour through Vienna's city center

"During my time at the YSSP I met many ambitious young scientists and experienced senior research fellows coming from different countries and working in various fields. It really broadened my perspective and inspired my further research. The seminars and presentations held at IIASA really shared different points of view and gave me new perspectives on my research. It was an extraordinary and unforgettable time."

Siyuan Yang, 2015

Social activities

Weekend trip to Bad Aussee

Friday, 9-11 June, 12:50

Meeting point: Schloss entrance area

Historical tour of the castle

Tuesday, 13 June, 16:00-17:30

Meeting point: Schloss entrance area

Brian Fath, YSSP Scientific Coordinator

Throughout the summer

Tennis, table tennis, volleyball, yoga, soccer (incl. tournaments) and swimming (public swimming pool within walking distance)

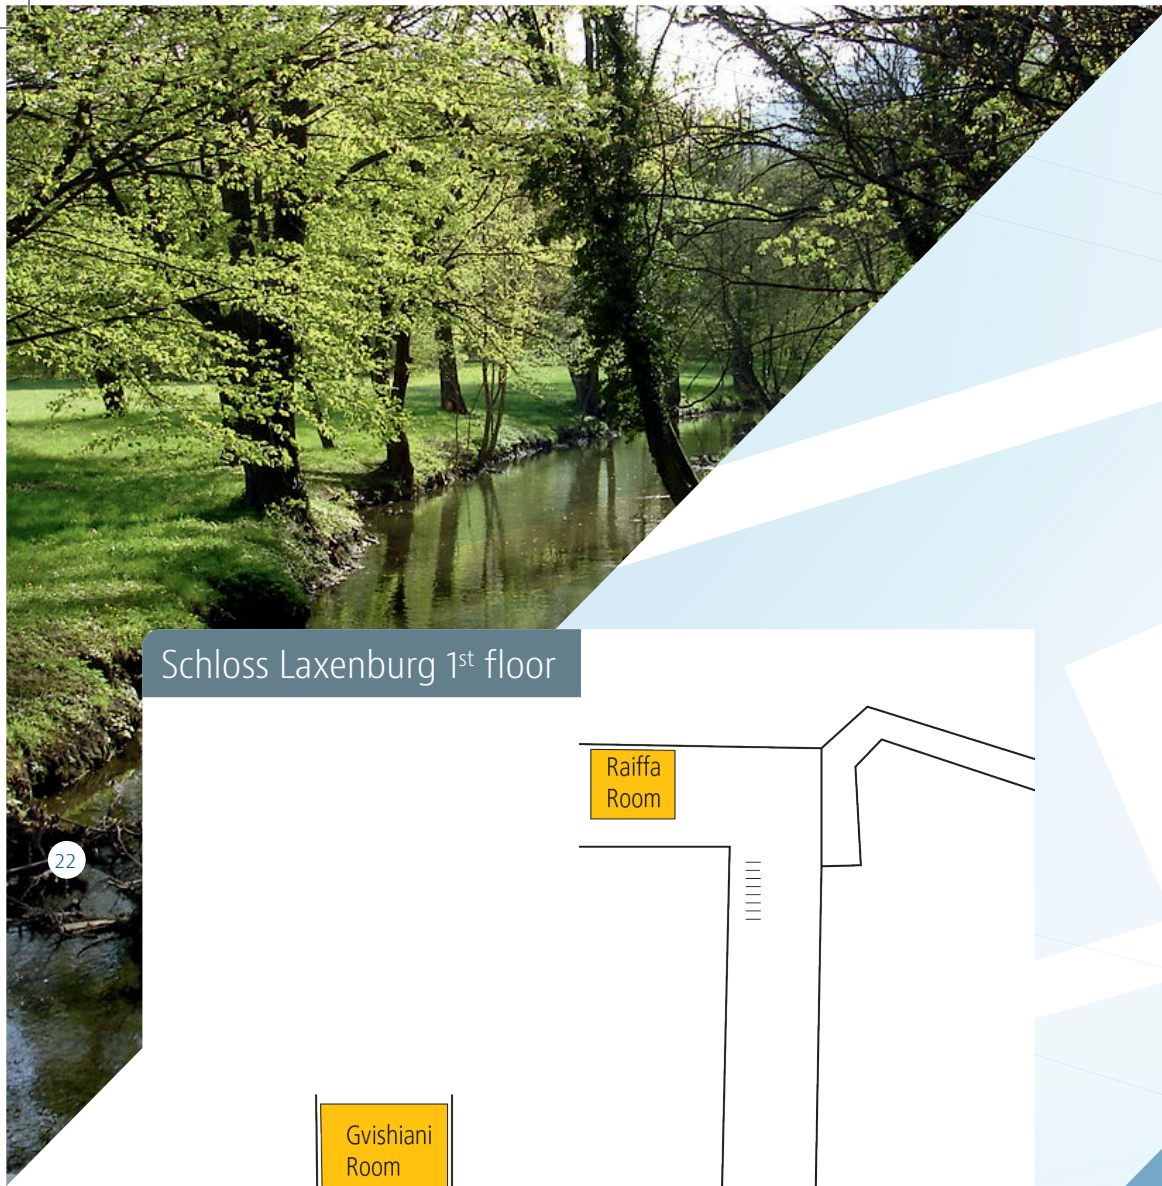

TBA YSSP Boat Race & BBQ

TBA Movie Sessions

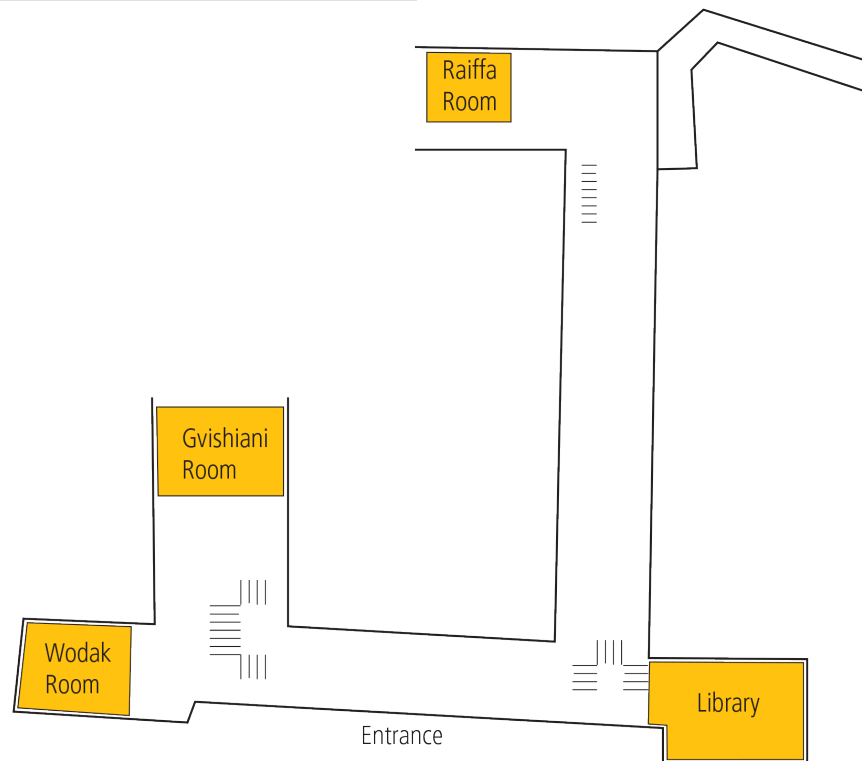

TBA Art Vernissages

In addition, you may like to organize your own social activities (e.g., exploring Vienna's social scene, various trips around Austria, international days etc.). The YSSP Team and STAC can help you with these events by providing local information and tips.

Stay in touch

26

At the end of your YSSP stay, all of you will be IIASA alumni/ae (from the Latin, "nourished"). You will be leaving, nourished and hopefully enriched, with certificates as proof. Most likely you will take with you positive memories of a productive and enjoyable stay at IIASA, as well as new ideas, contacts, and relationships that inevitably develop during the summer.

The IIASA Alumni Association hopes to help you maintain a continuing relationship with the institute and colleagues, by keeping the information that you give us about your activities up-to-date and publishing what you would like others to know about your whereabouts, your work, and your interests.

Through the Alumni Association, IIASA also wishes to keep you informed about new programs that you might find interesting; to ask your help in making YSSP and IIASA better known; to receive feedback and ideas about the institute, its programs, and possible future areas of research.

When the summer is almost over, you can join the IIASA Alumni Association.

The Alumni Association wishes you a most successful three months, and looks forward to helping you remain an important part of the institute's extended family when you leave.
