

1.1.1. The Intention Behind this Excel File

This Excel file is made available on the Internet to satisfy scientific and educational purposes. It is meant for experts as well as for students, who are interested in the issue of temporal verification of net greenhouse gas (**GHG**) emission changes under the Kyoto Protocol. It aims at introducing a verification concept that appears to have sufficient potential to be developed further, although it does not yet present a complete, fully tested and applicable product.
