

*What happened in Geneva last week ?
And what will happen next ?*

Anna Engleryd

An amended Gothenburg protocol

☺ what's new ?

- Emission reduction commitments – relative ceilings.
- PM 2,5
- BC to be considered as a fraction of PM 2,5
- Updated/new Technical Annexes –possible to update
- no new annex IX – but a possibility to revise in the near future
- Flexibility for new parties - CET
- Adjustments
- Paved the way for new parties to the protocol

Adjustments

To emission reduction commitments or inventories for compliance purposes

- Under extraordinary circumstances
 - new emission source category
 - significant change in emission factors
 - significant changes to the methodology for determining emissions from a specific source category.
- Request to EMEP to develop provisional guidance for consideration by the EB 31 – dec 2012

Within the EU

- 27 countries....with 27 views
- Bad timing – economic crisis
- 1st priority – more parties on board
- The effect based approach got lost....
- ...the cost effectiveness got lost...
- ...and so did the modelled scenarios.
- Gbg protocol – a small step in the right direction
- 2013 Year of the Air. New NECD, AQ directive, Thematic Strategy

What's next ?

- Development of guidance for adjustments (EMEP)
- Development of mitigation options and methods for emission inventories of BC (TFEIP, HTAP, TFIAM, EGTEI)
- Revision of the HM protocol – dec 2012 ?
- Reorganisation of the Convention

What's next for TFIAM ?
