Introduction to the workshop

Towards Innovative Solutions through
Integrative Water Futures Analysis

IIASA, International Institute for Applied Systems Analysis

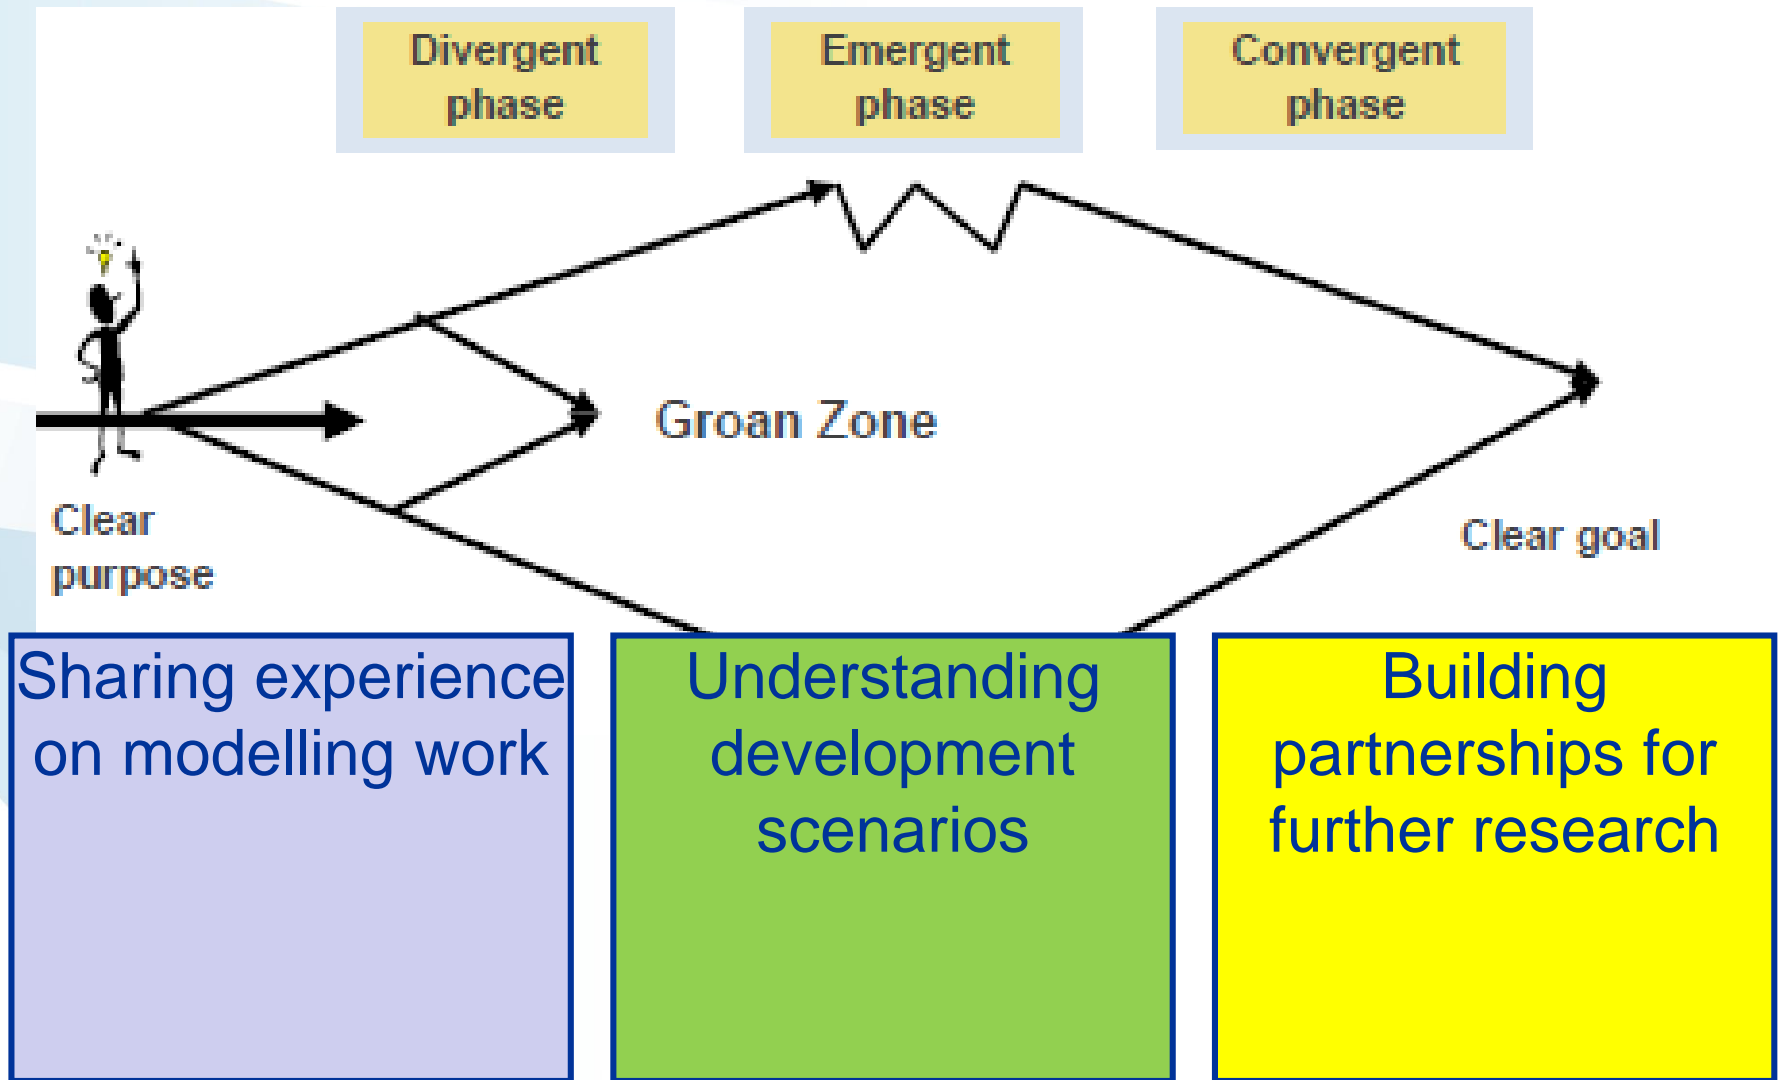

Solutions for a water secure East Africa in 2050

Looking into mid- to long term water resources management

- Approaches, tools and techniques
- Understanding key determinants
- Unlock collaboration, mutual benefits

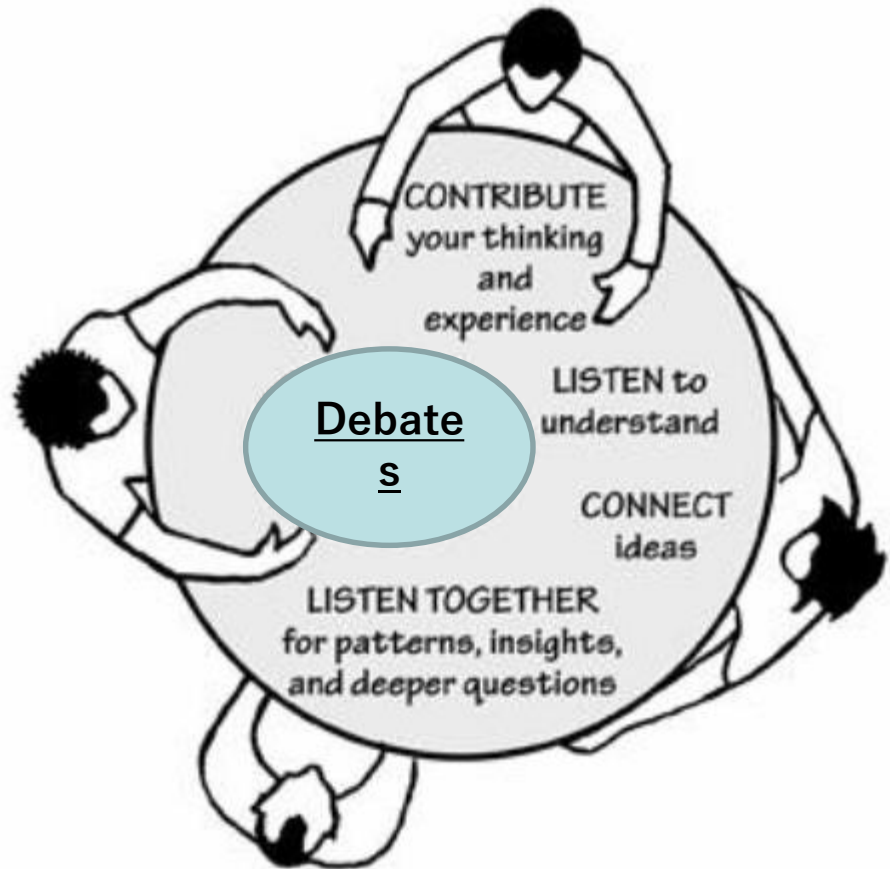

Power of a deep *breath*!

Ground rules?

- Respect for openness and eagerness
- Hierarchy
- Time keeping

Listening perspectives

- **Capacities:**

How can we harness all this knowledge for strengthening our mutual capacities?

- **Development scenarios:**

How can we refine our information on likely future developments in East Africa?

- **Uncertainty / input data:**

Which are the key sources of uncertainty and how can they be managed best in the modelling frameworks?

- **Water for agriculture:**

How well do we understand current and future agricultural water demand?

Listening perspectives

- Listen deeper, listen beyond the narrative
- Exchange in groups in the afternoon break
(SWAT as possible structure)
- Harvest in plenary
